

Testing Methodologies (White Box Vs Black Box Testing)

White Box Testing

In this testing, we test the internal logic of the program.
To conduct this testing we should aware of programming.
Ex: Unit Testing

Black Box Testing

Without knowing the internal logic of the program, we test over all functionality of the application whether it is working according to the client's requirements or not.

Ex: System Testing

Grey Box Testing

It is the both combination of white box and black box testing.
Ex: Database Testing
